

Field Catalogue

Catalogue

Every item below is available to any crew with the caps to spare.

Nor Vane

The Nor Vane is a field device. Cost: 719 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Ith Prism

The Ith Prism is a field device. Cost: 56 caps. Weight: 30 pounds. It requires no training to operate and fits in a standard pack.

Lor Lens

The Lor Lens is a field device. Cost: 199 caps. Weight: 11 pounds. It requires no training to operate and fits in a standard pack.

Dur Anchor

The Dur Anchor is a field device. Cost: 285 caps. Weight: 29 pounds. It requires no training to operate and fits in a standard pack.

Sten Anchor

The Sten Anchor is a field device. Cost: 13 caps. Weight: 17 pounds. It requires no training to operate and fits in a standard pack.

Mar Filament

The Mar Filament is a field device. Cost: 382 caps. Weight: 22 pounds. It requires no training to operate and fits in a standard pack.

Rus Sieve

The Rus Sieve is a field device. Cost: 570 caps. Weight: 21 pounds. It requires no training to operate and fits in a standard pack.

Tor Filament

The Tor Filament is a field device. Cost: 260 caps. Weight: 3 pounds. It requires no training to operate and fits in a standard pack.

Yor Tether

The Yor Tether is a field device. Cost: 913 caps. Weight: 20 pounds. It requires no training to operate and fits in a standard pack.

Gar Damper

The Gar Damper is a field device. Cost: 233 caps. Weight: 23 pounds. It requires no training to operate and fits in a standard pack.

Nor Valve

The Nor Valve is a field device. Cost: 197 caps. Weight: 1 pounds. It requires no training to operate and fits in a standard pack.

Yor Wedge

The Yor Wedge is a field device. Cost: 353 caps. Weight: 25 pounds. It requires no training to operate and fits in a standard pack.

Ald Valve

The Ald Valve is a field device. Cost: 95 caps. Weight: 31 pounds. It requires no training to operate and fits in a standard pack.

Gar Beacon

The Gar Beacon is a field device. Cost: 295 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Var Beacon

The Var Beacon is a field device. Cost: 681 caps. Weight: 13 pounds. It requires no training to operate and fits in a standard pack.

Gar Anchor

The Gar Anchor is a field device. Cost: 264 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Dur Wedge

The Dur Wedge is a field device. Cost: 804 caps. Weight: 1 pounds. It requires no training to operate and fits in a standard pack.

Quil Filament

The Quil Filament is a field device. Cost: 103 caps. Weight: 17 pounds. It requires no training to operate and fits in a standard pack.

Tor Helm

The Tor Helm is a field device. Cost: 846 caps. Weight: 6 pounds. It requires no training to operate and fits in a standard pack.

Var Coil

The Var Coil is a field device. Cost: 157 caps. Weight: 26 pounds. It requires no training to operate and fits in a standard pack.

Dur Yoke

The Dur Yoke is a field device. Cost: 610 caps. Weight: 3 pounds. It requires no training to operate and fits in a standard pack.

Fen Beacon

The Fen Beacon is a field device. Cost: 413 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Fen Piston

The Fen Piston is a field device. Cost: 316 caps. Weight: 20 pounds. It requires no training to operate and fits in a standard pack.

Cor Beacon

The Cor Beacon is a field device. Cost: 654 caps. Weight: 15 pounds. It requires no training to operate and fits in a standard pack.

Jor Sieve

The Jor Sieve is a field device. Cost: 96 caps. Weight: 38 pounds. It requires no training to operate and fits in a standard pack.

Orn Vane

The Orn Vane is a field device. Cost: 990 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Jor Lens

The Jor Lens is a field device. Cost: 883 caps. Weight: 10 pounds. It requires no training to operate and fits in a standard pack.

Yor Kettle

The Yor Kettle is a field device. Cost: 683 caps. Weight: 39 pounds. It requires no training to operate and fits in a standard pack.

Dur Coil

The Dur Coil is a field device. Cost: 408 caps. Weight: 21 pounds. It requires no training to operate and fits in a standard pack.

Pel Wedge

The Pel Wedge is a field device. Cost: 747 caps. Weight: 32 pounds. It requires no training to operate and fits in a standard pack.

Ulm Damper

The Ulm Damper is a field device. Cost: 163 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Gar Kettle

The Gar Kettle is a field device. Cost: 751 caps. Weight: 40 pounds. It requires no training to operate and fits in a standard pack.

Lor Sieve

The Lor Sieve is a field device. Cost: 668 caps. Weight: 10 pounds. It requires no training to operate and fits in a standard pack.

Rus Piston

The Rus Piston is a field device. Cost: 54 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Gar Spindle

The Gar Spindle is a field device. Cost: 652 caps. Weight: 28 pounds. It requires no training to operate and fits in a standard pack.

Pel Chisel

The Pel Chisel is a field device. Cost: 761 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Tor Ladle

The Tor Ladle is a field device. Cost: 152 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Tor Piston

The Tor Piston is a field device. Cost: 780 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Yor Spindle

The Yor Spindle is a field device. Cost: 592 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Yor Anchor

The Yor Anchor is a field device. Cost: 856 caps. Weight: 38 pounds. It requires no training to operate and fits in a standard pack.

Ulm Beacon

The Ulm Beacon is a field device. Cost: 827 caps. Weight: 15 pounds. It requires no training to operate and fits in a standard pack.

Bren Valve

The Bren Valve is a field device. Cost: 97 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Tor Valve

The Tor Valve is a field device. Cost: 52 caps. Weight: 9 pounds. It requires no training to operate and fits in a standard pack.

Nor Tether

The Nor Tether is a field device. Cost: 662 caps. Weight: 24 pounds. It requires no training to operate and fits in a standard pack.

Cor Valve

The Cor Valve is a field device. Cost: 117 caps. Weight: 25 pounds. It requires no training to operate and fits in a standard pack.

Rus Chisel

The Rus Chisel is a field device. Cost: 865 caps. Weight: 29 pounds. It requires no training to operate and fits in a standard pack.

Ald Wedge

The Ald Wedge is a field device. Cost: 581 caps. Weight: 4 pounds. It requires no training to operate and fits in a standard pack.

Ald Piston

The Ald Piston is a field device. Cost: 652 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Gar Rudder

The Gar Rudder is a field device. Cost: 651 caps. Weight: 35 pounds. It requires no training to operate and fits in a standard pack.

Quil Anchor

The Quil Anchor is a field device. Cost: 707 caps. Weight: 16 pounds. It requires no training to operate and fits in a standard pack.

Bren Chisel

The Bren Chisel is a field device. Cost: 511 caps. Weight: 17 pounds. It requires no training to operate and fits in a standard pack.

Fen Vane

The Fen Vane is a field device. Cost: 13 caps. Weight: 30 pounds. It requires no training to operate and fits in a standard pack.

Var Chisel

The Var Chisel is a field device. Cost: 826 caps. Weight: 5 pounds. It requires no training to operate and fits in a standard pack.

Hol Hinge

The Hol Hinge is a field device. Cost: 776 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Quil Ladle

The Quil Ladle is a field device. Cost: 929 caps. Weight: 35 pounds. It requires no training to operate and fits in a standard pack.

Kel Kettle

The Kel Kettle is a field device. Cost: 104 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Tor Kettle

The Tor Kettle is a field device. Cost: 77 caps. Weight: 31 pounds. It requires no training to operate and fits in a standard pack.

Bren Needle

The Bren Needle is a field device. Cost: 268 caps. Weight: 5 pounds. It requires no training to operate and fits in a standard pack.

Var Hinge

The Var Hinge is a field device. Cost: 876 caps. Weight: 17 pounds. It requires no training to operate and fits in a standard pack.

Pel Coil

The Pel Coil is a field device. Cost: 250 caps. Weight: 14 pounds. It requires no training to operate and fits in a standard pack.

Ald Hinge

The Ald Hinge is a field device. Cost: 246 caps. Weight: 30 pounds. It requires no training to operate and fits in a standard pack.

Hol Tether

The Hol Tether is a field device. Cost: 515 caps. Weight: 25 pounds. It requires no training to operate and fits in a standard pack.

Ald Prism

The Ald Prism is a field device. Cost: 88 caps. Weight: 31 pounds. It requires no training to operate and fits in a standard pack.

Gar Tether

The Gar Tether is a field device. Cost: 942 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Var Anchor

The Var Anchor is a field device. Cost: 795 caps. Weight: 3 pounds. It requires no training to operate and fits in a standard pack.

Var Kettle

The Var Kettle is a field device. Cost: 641 caps. Weight: 13 pounds. It requires no training to operate and fits in a standard pack.

Kel Gasket

The Kel Gasket is a field device. Cost: 89 caps. Weight: 39 pounds. It requires no training to operate and fits in a standard pack.

Lor Vane

The Lor Vane is a field device. Cost: 160 caps. Weight: 22 pounds. It requires no training to operate and fits in a standard pack.

Var Needle

The Var Needle is a field device. Cost: 270 caps. Weight: 20 pounds. It requires no training to operate and fits in a standard pack.

Nor Ladle

The Nor Ladle is a field device. Cost: 646 caps. Weight: 37 pounds. It requires no training to operate and fits in a standard pack.

Fen Valve

The Fen Valve is a field device. Cost: 146 caps. Weight: 1 pounds. It requires no training to operate and fits in a standard pack.

Quil Gasket

The Quil Gasket is a field device. Cost: 503 caps. Weight: 4 pounds. It requires no training to operate and fits in a standard pack.

Tor Damper

The Tor Damper is a field device. Cost: 507 caps. Weight: 18 pounds. It requires no training to operate and fits in a standard pack.

Lor Needle

The Lor Needle is a field device. Cost: 698 caps. Weight: 7 pounds. It requires no training to operate and fits in a standard pack.

Orn Gasket

The Orn Gasket is a field device. Cost: 718 caps. Weight: 14 pounds. It requires no training to operate and fits in a standard pack.

Cor Filament

The Cor Filament is a field device. Cost: 701 caps. Weight: 32 pounds. It requires no training to operate and fits in a standard pack.

Lor Rudder

The Lor Rudder is a field device. Cost: 307 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Quil Piston

The Quil Piston is a field device. Cost: 302 caps. Weight: 30 pounds. It requires no training to operate and fits in a standard pack.

Jor Coil

The Jor Coil is a field device. Cost: 487 caps. Weight: 30 pounds. It requires no training to operate and fits in a standard pack.

Bren Spindle

The Bren Spindle is a field device. Cost: 795 caps. Weight: 8 pounds. It requires no training to operate and fits in a standard pack.

Ith Yoke

The Ith Yoke is a field device. Cost: 925 caps. Weight: 36 pounds. It requires no training to operate and fits in a standard pack.

Var Helm

The Var Helm is a field device. Cost: 214 caps. Weight: 20 pounds. It requires no training to operate and fits in a standard pack.

Rus Vane

The Rus Vane is a field device. Cost: 97 caps. Weight: 31 pounds. It requires no training to operate and fits in a standard pack.

Jor Ladle

The Jor Ladle is a field device. Cost: 27 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Wen Coil

The Wen Coil is a field device. Cost: 479 caps. Weight: 5 pounds. It requires no training to operate and fits in a standard pack.

Sten Filament

The Sten Filament is a field device. Cost: 849 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Kel Sieve

The Kel Sieve is a field device. Cost: 470 caps. Weight: 18 pounds. It requires no training to operate and fits in a standard pack.

Ald Damper

The Ald Damper is a field device. Cost: 406 caps. Weight: 14 pounds. It requires no training to operate and fits in a standard pack.

Orn Damper

The Orn Damper is a field device. Cost: 948 caps. Weight: 14 pounds. It requires no training to operate and fits in a standard pack.

Gar Piston

The Gar Piston is a field device. Cost: 86 caps. Weight: 38 pounds. It requires no training to operate and fits in a standard pack.

Yor Gasket

The Yor Gasket is a field device. Cost: 102 caps. Weight: 10 pounds. It requires no training to operate and fits in a standard pack.

Hol Yoke

The Hol Yoke is a field device. Cost: 775 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Orn Lens

The Orn Lens is a field device. Cost: 278 caps. Weight: 24 pounds. It requires no training to operate and fits in a standard pack.

Yor Coil

The Yor Coil is a field device. Cost: 145 caps. Weight: 39 pounds. It requires no training to operate and fits in a standard pack.

Tor Sieve

The Tor Sieve is a field device. Cost: 849 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Dur Piston

The Dur Piston is a field device. Cost: 296 caps. Weight: 8 pounds. It requires no training to operate and fits in a standard pack.

Var Piston

The Var Piston is a field device. Cost: 730 caps. Weight: 24 pounds. It requires no training to operate and fits in a standard pack.

Rus Lens

The Rus Lens is a field device. Cost: 246 caps. Weight: 32 pounds. It requires no training to operate and fits in a standard pack.

Sten Chisel

The Sten Chisel is a field device. Cost: 929 caps. Weight: 32 pounds. It requires no training to operate and fits in a standard pack.

Cor Tether

The Cor Tether is a field device. Cost: 413 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Ald Sieve

The Ald Sieve is a field device. Cost: 172 caps. Weight: 1 pounds. It requires no training to operate and fits in a standard pack.

Hol Prism

The Hol Prism is a field device. Cost: 982 caps. Weight: 32 pounds. It requires no training to operate and fits in a standard pack.

Gar Valve

The Gar Valve is a field device. Cost: 707 caps. Weight: 29 pounds. It requires no training to operate and fits in a standard pack.

Mar Yoke

The Mar Yoke is a field device. Cost: 425 caps. Weight: 20 pounds. It requires no training to operate and fits in a standard pack.

Ulm Rudder

The Ulm Rudder is a field device. Cost: 754 caps. Weight: 10 pounds. It requires no training to operate and fits in a standard pack.

Mar Damper

The Mar Damper is a field device. Cost: 436 caps. Weight: 23 pounds. It requires no training to operate and fits in a standard pack.

Hol Wedge

The Hol Wedge is a field device. Cost: 395 caps. Weight: 21 pounds. It requires no training to operate and fits in a standard pack.

Yor Piston

The Yor Piston is a field device. Cost: 133 caps. Weight: 22 pounds. It requires no training to operate and fits in a standard pack.

Rus Mantle

The Rus Mantle is a field device. Cost: 11 caps. Weight: 21 pounds. It requires no training to operate and fits in a standard pack.

Ith Mantle

The Ith Mantle is a field device. Cost: 778 caps. Weight: 22 pounds. It requires no training to operate and fits in a standard pack.

Rus Helm

The Rus Helm is a field device. Cost: 869 caps. Weight: 26 pounds. It requires no training to operate and fits in a standard pack.

Ald Vane

The Ald Vane is a field device. Cost: 132 caps. Weight: 13 pounds. It requires no training to operate and fits in a standard pack.

Quil Vane

The Quil Vane is a field device. Cost: 740 caps. Weight: 1 pounds. It requires no training to operate and fits in a standard pack.

Quil Sieve

The Quil Sieve is a field device. Cost: 933 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Ith Spindle

The Ith Spindle is a field device. Cost: 269 caps. Weight: 24 pounds. It requires no training to operate and fits in a standard pack.

Ulm Spindle

The Ulm Spindle is a field device. Cost: 76 caps. Weight: 26 pounds. It requires no training to operate and fits in a standard pack.

Lor Beacon

The Lor Beacon is a field device. Cost: 409 caps. Weight: 38 pounds. It requires no training to operate and fits in a standard pack.

Bren Vane

The Bren Vane is a field device. Cost: 88 caps. Weight: 24 pounds. It requires no training to operate and fits in a standard pack.

Kel Mantle

The Kel Mantle is a field device. Cost: 957 caps. Weight: 28 pounds. It requires no training to operate and fits in a standard pack.

Ith Ladle

The Ith Ladle is a field device. Cost: 783 caps. Weight: 18 pounds. It requires no training to operate and fits in a standard pack.

Sten Damper

The Sten Damper is a field device. Cost: 884 caps. Weight: 4 pounds. It requires no training to operate and fits in a standard pack.

Ald Chisel

The Ald Chisel is a field device. Cost: 297 caps. Weight: 7 pounds. It requires no training to operate and fits in a standard pack.

Wen Mantle

The Wen Mantle is a field device. Cost: 62 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Nor Needle

The Nor Needle is a field device. Cost: 660 caps. Weight: 10 pounds. It requires no training to operate and fits in a standard pack.

Bren Kettle

The Bren Kettle is a field device. Cost: 265 caps. Weight: 18 pounds. It requires no training to operate and fits in a standard pack.

Orn Prism

The Orn Prism is a field device. Cost: 456 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Hol Vane

The Hol Vane is a field device. Cost: 333 caps. Weight: 13 pounds. It requires no training to operate and fits in a standard pack.

Dur Hinge

The Dur Hinge is a field device. Cost: 801 caps. Weight: 24 pounds. It requires no training to operate and fits in a standard pack.

Elm Lens

The Elm Lens is a field device. Cost: 813 caps. Weight: 28 pounds. It requires no training to operate and fits in a standard pack.

Ith Piston

The Ith Piston is a field device. Cost: 915 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Wen Wedge

The Wen Wedge is a field device. Cost: 841 caps. Weight: 26 pounds. It requires no training to operate and fits in a standard pack.

Mar Coil

The Mar Coil is a field device. Cost: 945 caps. Weight: 36 pounds. It requires no training to operate and fits in a standard pack.

Fen Tether

The Fen Tether is a field device. Cost: 572 caps. Weight: 14 pounds. It requires no training to operate and fits in a standard pack.

Pel Yoke

The Pel Yoke is a field device. Cost: 746 caps. Weight: 6 pounds. It requires no training to operate and fits in a standard pack.

Rus Damper

The Rus Damper is a field device. Cost: 60 caps. Weight: 27 pounds. It requires no training to operate and fits in a standard pack.

Ald Yoke

The Ald Yoke is a field device. Cost: 471 caps. Weight: 40 pounds. It requires no training to operate and fits in a standard pack.

Lor Mantle

The Lor Mantle is a field device. Cost: 780 caps. Weight: 9 pounds. It requires no training to operate and fits in a standard pack.

Lor Yoke

The Lor Yoke is a field device. Cost: 669 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Wen Yoke

The Wen Yoke is a field device. Cost: 507 caps. Weight: 4 pounds. It requires no training to operate and fits in a standard pack.

Pel Piston

The Pel Piston is a field device. Cost: 943 caps. Weight: 36 pounds. It requires no training to operate and fits in a standard pack.

Wen Lens

The Wen Lens is a field device. Cost: 140 caps. Weight: 11 pounds. It requires no training to operate and fits in a standard pack.

Elm Beacon

The Elm Beacon is a field device. Cost: 493 caps. Weight: 27 pounds. It requires no training to operate and fits in a standard pack.

Var Wedge

The Var Wedge is a field device. Cost: 361 caps. Weight: 19 pounds. It requires no training to operate and fits in a standard pack.

Elm Ladle

The Elm Ladle is a field device. Cost: 314 caps. Weight: 17 pounds. It requires no training to operate and fits in a standard pack.

Gar Lens

The Gar Lens is a field device. Cost: 766 caps. Weight: 17 pounds. It requires no training to operate and fits in a standard pack.

Cor Damper

The Cor Damper is a field device. Cost: 425 caps. Weight: 16 pounds. It requires no training to operate and fits in a standard pack.

Ulm Needle

The Ulm Needle is a field device. Cost: 318 caps. Weight: 31 pounds. It requires no training to operate and fits in a standard pack.

Fen Spindle

The Fen Spindle is a field device. Cost: 580 caps. Weight: 26 pounds. It requires no training to operate and fits in a standard pack.

Elm Vane

The Elm Vane is a field device. Cost: 132 caps. Weight: 11 pounds. It requires no training to operate and fits in a standard pack.

Bren Coil

The Bren Coil is a field device. Cost: 668 caps. Weight: 11 pounds. It requires no training to operate and fits in a standard pack.

Quil Helm

The Quil Helm is a field device. Cost: 86 caps. Weight: 14 pounds. It requires no training to operate and fits in a standard pack.

Rus Rudder

The Rus Rudder is a field device. Cost: 522 caps. Weight: 32 pounds. It requires no training to operate and fits in a standard pack.

Kel Prism

The Kel Prism is a field device. Cost: 573 caps. Weight: 15 pounds. It requires no training to operate and fits in a standard pack.

Rus Prism

The Rus Prism is a field device. Cost: 473 caps. Weight: 22 pounds. It requires no training to operate and fits in a standard pack.

Jor Helm

The Jor Helm is a field device. Cost: 787 caps. Weight: 29 pounds. It requires no training to operate and fits in a standard pack.

Rus Ladle

The Rus Ladle is a field device. Cost: 447 caps. Weight: 9 pounds. It requires no training to operate and fits in a standard pack.

Var Prism

The Var Prism is a field device. Cost: 570 caps. Weight: 13 pounds. It requires no training to operate and fits in a standard pack.

Gar Yoke

The Gar Yoke is a field device. Cost: 259 caps. Weight: 6 pounds. It requires no training to operate and fits in a standard pack.

Lor Gasket

The Lor Gasket is a field device. Cost: 188 caps. Weight: 22 pounds. It requires no training to operate and fits in a standard pack.

Cor Anchor

The Cor Anchor is a field device. Cost: 579 caps. Weight: 6 pounds. It requires no training to operate and fits in a standard pack.

Rus Spindle

The Rus Spindle is a field device. Cost: 336 caps. Weight: 16 pounds. It requires no training to operate and fits in a standard pack.

Elm Kettle

The Elm Kettle is a field device. Cost: 387 caps. Weight: 17 pounds. It requires no training to operate and fits in a standard pack.

Mar Prism

The Mar Prism is a field device. Cost: 838 caps. Weight: 37 pounds. It requires no training to operate and fits in a standard pack.

Ald Rudder

The Ald Rudder is a field device. Cost: 216 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Dur Chisel

The Dur Chisel is a field device. Cost: 777 caps. Weight: 27 pounds. It requires no training to operate and fits in a standard pack.

Ulm Ladle

The Ulm Ladle is a field device. Cost: 402 caps. Weight: 27 pounds. It requires no training to operate and fits in a standard pack.

Mar Gasket

The Mar Gasket is a field device. Cost: 773 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Var Rudder

The Var Rudder is a field device. Cost: 225 caps. Weight: 25 pounds. It requires no training to operate and fits in a standard pack.

Pel Gasket

The Pel Gasket is a field device. Cost: 286 caps. Weight: 22 pounds. It requires no training to operate and fits in a standard pack.

Ulm Gasket

The Ulm Gasket is a field device. Cost: 780 caps. Weight: 4 pounds. It requires no training to operate and fits in a standard pack.

Pel Beacon

The Pel Beacon is a field device. Cost: 520 caps. Weight: 18 pounds. It requires no training to operate and fits in a standard pack.

Sten Spindle

The Sten Spindle is a field device. Cost: 598 caps. Weight: 24 pounds. It requires no training to operate and fits in a standard pack.

Pel Damper

The Pel Damper is a field device. Cost: 138 caps. Weight: 33 pounds. It requires no training to operate and fits in a standard pack.

Sten Rudder

The Sten Rudder is a field device. Cost: 551 caps. Weight: 14 pounds. It requires no training to operate and fits in a standard pack.

Quil Yoke

The Quil Yoke is a field device. Cost: 104 caps. Weight: 18 pounds. It requires no training to operate and fits in a standard pack.

Ith Beacon

The Ith Beacon is a field device. Cost: 928 caps. Weight: 16 pounds. It requires no training to operate and fits in a standard pack.

Mar Piston

The Mar Piston is a field device. Cost: 403 caps. Weight: 26 pounds. It requires no training to operate and fits in a standard pack.

Wen Spindle

The Wen Spindle is a field device. Cost: 671 caps. Weight: 29 pounds. It requires no training to operate and fits in a standard pack.

Rus Needle

The Rus Needle is a field device. Cost: 452 caps. Weight: 20 pounds. It requires no training to operate and fits in a standard pack.

Yor Ladle

The Yor Ladle is a field device. Cost: 879 caps. Weight: 2 pounds. It requires no training to operate and fits in a standard pack.

Ith Helm

The Ith Helm is a field device. Cost: 140 caps. Weight: 3 pounds. It requires no training to operate and fits in a standard pack.

Tor Mantle

The Tor Mantle is a field device. Cost: 445 caps. Weight: 31 pounds. It requires no training to operate and fits in a standard pack.

Pel Vane

The Pel Vane is a field device. Cost: 611 caps. Weight: 32 pounds. It requires no training to operate and fits in a standard pack.

Pel Needle

The Pel Needle is a field device. Cost: 10 caps. Weight: 5 pounds. It requires no training to operate and fits in a standard pack.

Fen Gasket

The Fen Gasket is a field device. Cost: 410 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Jor Gasket

The Jor Gasket is a field device. Cost: 885 caps. Weight: 30 pounds. It requires no training to operate and fits in a standard pack.

Yor Vane

The Yor Vane is a field device. Cost: 469 caps. Weight: 16 pounds. It requires no training to operate and fits in a standard pack.

Gar Hinge

The Gar Hinge is a field device. Cost: 811 caps. Weight: 7 pounds. It requires no training to operate and fits in a standard pack.

Wen Beacon

The Wen Beacon is a field device. Cost: 239 caps. Weight: 10 pounds. It requires no training to operate and fits in a standard pack.

Elm Piston

The Elm Piston is a field device. Cost: 165 caps. Weight: 34 pounds. It requires no training to operate and fits in a standard pack.

Ald Needle

The Ald Needle is a field device. Cost: 708 caps. Weight: 7 pounds. It requires no training to operate and fits in a standard pack.

Lor Prism

The Lor Prism is a field device. Cost: 974 caps. Weight: 30 pounds. It requires no training to operate and fits in a standard pack.
